

ECO374 Homework 1, Due July 19

1. **[3pts]** Main text, exercises on p. 17 - 22 (Figure E.1 - E.11).
 - a. Arbitrarily choose **five** figures.
 - b. Follow the “source data” of each graph, collect data, and replicate these graphs (note: you can plot data series to more recent dates than shown in the textbook graphs).
 - c. Answer corresponding questions from the textbook.
 - d. Submit your solution (answers to questions, graphs) within a single PDF file.
 - e. For this question, you can manipulate data and create the graphs using Excel; but doing all these in R is highly recommended.
 - f. You do not have to stick with the time periods shown in the textbook figures. You are welcomed to include and discuss more recent periods.
2. **[1.5pts each]** Chapter 2, exercise 2, 3, and 4.
